INTRODUCTION

The primary purpose for the annual report of the Westchester County Tax Commission is to provide key information related to the apportionment of the County tax levy. Page 6 lists the percentages of the levy for which each city and town is responsible. The pages that follow display the methodology used to arrive at the taxable assessed value of each municipality and provide information on the composition of the tax base and historical data which may be of interest. The nature of the information presented on each page is explained briefly below:

Page 6: The first column on this page lists the adjusted (see page 7) taxable (some real property is either partially or wholly exempt from taxation) assessed value of each city and town in Westchester County. In as much as a municipality may assess real property at any uniform percentage of market value, an equalization rate must be used to arrive at the full or market value of each. These rates, County equalization rates, each provided by the New York State Department of Taxation & Finance, Office of Real Property Tax Services (DFT/ORPTS), are listed in column two. It is the current year's final state equalization rate. It is based on sales and appraisals of all types of real property in each municipality and provides a measure of the percentage of market value at which a city or town assesses. It is not necessarily a statement of the current level of assessment but of the level as of the State's valuation date.

The assessed value in the first column is divided by the percentage in the second column to produce the third column, which shows the full value of each municipality. This procedure places the valuations of all cities and towns at an equal level. The total of this column is the taxable full value of the entire County. The percentages in the last column are the result of the division of each municipality's full value by the total County full value. It is these percentages that determine each municipality's share of the County tax levy.

We should note in passing that the County is not involved in the assessment function nor does it send out any tax bills to individual property owners. Based on the percentages discussed above, the County advises each city and town of its dollar share of the levy; it is then the responsibility of the cities and towns to apportion these amounts among their property owners, send out bills, and collect the taxes.

Page 7: Certain exemptions are by law established in fixed-dollar amounts regardless of the percentage of market value at which properties are assessed. By way of example, one type of veterans' exemption allows a \$7,500 maximum regardless of whether the municipality assesses a \$100,000 house at \$100,000 or \$10,000. The effect of these fixed-dollar exemptions is to give a town or city, which assesses at a very low percentage of market value, an advantage over one that assesses at a higher percentage when the full values are computed. To ensure that the sharing of the tax burden is equitable, the law requires that these exemptions be added back to the taxable assessed value before the full value is computed. On this page the fixed-dollar exemptions are added to the stated taxable assessed value to produce the adjusted taxable assessed value. This operation is for apportionment purposes only. When a city or town actually levies its taxes these exemptions do benefit the property owner.

Page 8: This page shows the year-to-year percent change in County equalization rates. A falling rate generally indicates rising value and the greater the decline in the rate the greater the appreciation in real property values assuming that no reassessment activity has taken place. Municipalities with rapidly declining County equalization rates will show greater

increases in their full value than those whose rates are dropping more slowly. When the measured value of a municipality falls, equalization rates rise.

In the event of a reassessment, a city or town might choose to assess at a higher percentage than previously (perhaps at full value or 100%) and its equalization rate would rise sharply.

Page 9: Percent changes in full value are shown on this page. These changes may result from changes in market value evidenced by changing equalization rates or in the case of a municipality that keeps its roll at 100%, rising or falling assessment values, court ordered reductions, or from the effect of new construction or fires and demolitions since the last assessment roll.

Page 10: This page presents a breakdown of the taxable assessed values in those towns that have villages.

Page 11: Certain types of real property are, in accordance with State law, assessed by the DTF/ORPTS rather than by the local municipal assessor. The most important in terms of value is special franchise property, which is utility property, located above, on or under the public right-of-way (streets, highways, etc.). These state-mandated assessments are shown on this page.

Page 12: Listed here are the various types of changes that account for the difference between each municipality's prior and current year taxable assessed value. The first column shows prior taxable assessed value. The second column, headed "adjustments", displays adjustments of an unusual nature that are required to explain changes between prior and current year taxable assessed value. In some cases, a balancing entry is required because the records of the municipality do not provide a complete explanation of year-to-year changes in taxable assessed value. Equalization changes, the third column, are those changes made to improve equity, i.e., increasing under assessed properties and decreasing over assessed parcels. The fourth column, physical changes are those made because of value changes brought about by new construction, fires, demolitions, and the like. The fifth column, State-mandated assessments are explained on the notes for "Page 11". The addition, removal or change of partial exemptions such as veterans or elderly exemptions affects taxable assessed values and the net of these changes is listed in the sixth column. Sometimes parcels that were formerly wholly exempt become taxable because a change in ownership or use no longer allows them to qualify for the exemption. The reverse may also occur. These changes are listed in the next to last column on the page. The final column shows the current year taxable assessed value that is the result of all of the changes applied to the prior year figure.

Page 13: As noted earlier, some property is exempt from taxation and this page displays a breakdown of exempt amounts. Partial exemptions are usually those that apply to individuals such as Senior Citizen and Veterans exemptions. Religious organizations, schools, hospitals, municipalities, etc... usually own wholly exempt property. When the value of all exempt property is added to the taxable value the result is the gross assessment roll. The right-hand column shows the percentage of the gross assessment roll that is exempt from taxation.

Pages 14 - 21: While state law mandates some exemptions, others are optional in the sense that a municipality may or may not adopt them or may adopt them at different levels. The Disability, Senior Citizen, STAR, Veteran, & Volunteer Firefighter & Ambulance Worker Exemptions are available to individuals who personally meet the exemption's criteria. The Alternate Veterans' exemption may be adopted at various levels or not at all. A municipality

may choose, within certain limits, the income cutoff level for the senior citizen and disability exemptions. These pages show the status of these optional exemptions for each municipality.

Page 22: The DTF/ORPTS recognizes nine categories of property type: 100=agricultural, 200=residential (one-, two-, and three-family homes and some condominiums), 300=vacant, 400=commercial (including condominiums), 500=recreation & entertainment, 600=community service (hospitals, schools, etc.), 700=industrial, 800=public service (utility) and 900=wild & forested lands. The gross assessed value of each type in each municipality is shown on these pages. Comparisons between municipalities should not be made because these figures are not equalized and thus reflect varying levels of assessment.

Page 23: Here, the assessed values on the preceding page are expressed as percentages to facilitate inter-municipal comparisons. In other words, one can compare the percent of Town A's gross roll that is comprised of vacant land to the equivalent figure for Town B. Percentages on this page and on page 25 may not add up to 100% because of rounding.

Page 24: The property type breakdown on this page is similar to that on page 22 except that the number of parcels in each category rather than the amount of gross assessed value is displayed. A parcel is an individual entry on an assessment roll.

Page 25: This page shows the property type breakdown expressed as percentages of the parcel count for each municipality.

Page 26: This page shows effective tax rates based on Residential Assessment Ratios. An effective tax rate indicates the typical percentage of property value paid in property tax. The Residential Assessment Ratio is based on sales of one, two, & three family homes in each municipality and provides a measure of the percentage of market value at which a city or town assesses one, two, & three family homes. The most recent year of tax rates and the Residential Assessment Ratios for the assessment/tax roll to which those tax rates were applied is used.

Page 27: This page shows effective tax rates based on Equalization Rates. An Equalization Rate is based on sales and appraisals of all types of real property in each municipality and provides a measure of the percentage of market value at which a city or town assesses all properties. It is not necessarily a statement of the current level of assessment but of the level as of the effective date of the equalization survey. The most recent year of tax rates and the Equalization Ratios for the assessment/tax roll to which those tax rates were applied is used.

Page 28: This page was newly created in 2017. It shows the tax apportionment by percent among County, municipal, school and special district taxes by community.

Page 29: This page is new in 2018. It shows the Historical Municipal County Tax rate for each municipality for the preceding ten years. It does not include Special Districts.

Page 30-31: These pages are new in 2018. They show the historical equalized full value of each municipality and the historical percent of full value for which each municipality is responsible for 10 years. Note that 2018 values apply to 2019 taxes and so forth.

If you have any questions or comments about the contents of this report please contact the Executive Director by email at ylm2@westchestercountyny.gov or call (914) 995-4328.

TOTALS:	\$ 75,999,642,041			\$ -	\$ 76,061,611,373

NOTE:

Chapter 280 of the Laws of 1985 requires that counties wishing to use equalization rates calculated by the then Office of Real Property Services add certain "fixed-dollar" exemptions back to stated taxable value when apportioning the county tax levy. Individual municipalities will, however, continue to use the stated taxable value to set the tax rate.

2024 CHANGE IN COUNTY EQUALIZATION RATES

MUNICIPALITY	2023 RATE	2024 RATE	% CHANGE
City of Mount Vernon	1.71	1.92	12.28%
City of New Rochelle	1.94	1.93	-0.52%

*Indian Point is Exempt but on Roll Section 6 which is taxable

PERSONAL EXEMPTION INFORMATION

Disability Exemption

New York State law (section 459-c of the Real Property Tax Law) gives local governments and public school districts the option of granting a reduction in the amount of property taxes paid by qualifying persons with disabilities.

For additional information, go to <http://www.tax.ny.gov/pit/property/exemption/disablexempt.htm>.

In the following table, the lower figure in each case indicates the maximum income at which an eligible homeowner may receive a 50% exemption. The higher figure is the maximum at which an eligible homeowner may receive a 5% exemption under the sliding scale. The sliding scale provides for decreasing exemption percentages to a minimum of 5% as income increases. The Cooperative (Co-op) column indicates whether this exemption is available to cooperative apartment residents.

Municipality	Co-op	2024 Municipality	2024 School
Westchester County	YES	\$50,000.00 to \$58,399.99	N/A

PERSONAL EXEMPTION INFORMATION

STAR

STAR is New York State's School Tax Relief Program that includes a STAR credit check or a partial property tax exemption from school taxes. It is available on a property owner's primary residence whether it's a condominium, cooperative apartment, manufactured home, farm dwelling, apartment building or mixed-use property where the property owner owns and lives in their home. New Yorkers who are receiving the STAR exemption and purchased their current home prior to May 1, 2014 may continue to receive the STAR exemption. New Yorkers who purchased their home between May 1, 2014 and August 1, 2015 may need to register to receive a STAR credit. New Yorkers who purchased their home after August 1, 2015 need to register to receive a STAR credit.

There are two (2) STAR property tax exemptions and credits: The **Basic STAR** exemption is available for owner-occupied, primary residences regardless of the owners' ages. The **Enhanced STAR** exemption is available for the primary residences of senior citizens (age 65 and older).

However, to be eligible for the tax rebate and either of these two (2) exemptions or credits the combined income of owner(s) who reside at the property, and any spouse who resides at the property, must not exceed the income limit applicable to each rebate, exemption or credit. For additional information, go to <https://www.tax.ny.gov/pit/property/star/eligibility.htm>

Maximum 2024-2025 STAR savings by Municipality

PERSONAL EXEMPTION INFORMATION

Veteran Exemption

The Eligible Funds Veterans' real property tax exemption (Real Property Tax Law, section 458) provides a partial exemption where property owned by a Veteran or certain other persons designated in the law has been purchased with pension, bonus, or insurance monies, referred to as "eligible funds." Another exemption, known as the Alternative Veterans' Exemption (Real Property Tax Law, section 458-a), is available only for residential property of veterans who served during wartime or received an expeditionary medal. In 2014 School Districts were given the option to adopt a resolution allowing the application of the alternative veterans' exemption to school taxes. Also the Cold War Veterans' Exemption (Real Property Tax Law 458-b), is available to veterans who served on active duty (exclusive of training) in the United States armed forces between September 2, 1945 and December 26, 1991, and who are not currently receiving either the eligible funds or Alternative Veterans' exemption. For additional information, go to <http://www.tax.ny.gov/pit/property/exemption/vetexempt.htm>

As it pertains to the Alternative Veterans' Exemption, a qualified residential parcel receives an exemption equal to 15% of its assessed value or the first figure in the table below for the municipality or school district multiplied by the applicable equalization rate, whichever is less. An additional exemption equal to 10% of its assessed value or the middle figure in the table below for the municipality multiplied by the applicable equalization rate, which ever is less, is available to eligible combat Veterans. Where a Veteran has received a service-connected disability rating from the Veterans' Administration or the Department of Defense, there is an additional exemption which is equal to one-half of the disability rating, multiplied by the assessed value of the property or the last figure in the table below for the municipality multiplied by the applicable equalization rate, which ever is less.

PERSONAL EXEMPTION INFORMATION

Volunteer Firefighter or Volunteer Ambulance Worker Exemption

Section 466-a of the Real Property Tax Law authorizes the governing body of a county, city, town, village, or school district to partially exempt the residence of a volunteer firefighter or volunteer ambulance worker. The firefighter's exemption does not apply if the area served by the company encompasses an area served by five or more professional firefighters. The ambulance worker's exemption does not apply if the area served by the company encompasses an area served by five or more professional ambulance workers.
