**Overall Project Description**

The Department of Information Technology's Server Group and Telecom Group currently supports the communication logging system which is comprised of thirty six (36) Server based systems along with their related applications and software providing audio recording capabilities for several county departments. Many of these departments, such as Emergency Services and Public Safety are mandated to store and maintain recordings of all of their operational transactions. These Audio Recordings and their metadata are comprised of individual archival records, some of which have a retention requirement of 21 years. The current communication logging systems are end of life and are no longer supported and need the ability to keep up with the increased demands and changes of the Federal Radio frequency spectrum.
