WD103 County Water District #1 - Alternate Water Supply

FIVE YEAR CAPITAL PROGRAM (in thousands)

	Estimated Ultimate Total Cost	Approp- riated	2024	2025	2026	2027	2028	Under Review
Gross Non-County Share	93,107	16,857	76,250					
County Share	93,107	16,857	76,250					

Project Description

This project will fund the installation of two Ultraviolet (UV) facilities at the northern portion of the 48-inch Kensico-Bronx pipeline (KBP) for County Water District #1; and now will provide for an alternate water supply connection at the southern end of the KBP. The first phase of the project included the installation of UV facilities at the Central Avenue Pumping Station (CAPS) and the Orchard Street Pumping Station which are now complete. However, the Westchester County Health Department (WCDOH) has identified some deficiencies in the emergency backup power system that will be addressed in a subsequent phase. Phase II: Design for the southern connection and the facilities emergency backup system upgrade are anticipated to start in 2023 with construction appropriations shown in 2024. A budget modification is requested to increase the 2024 appropriations for Phase II.

Appropriation Requests

- 2003: \$200,000 for Study.
- 2014: \$9,219,000 for Design and Construction.
- 2016: \$1,438,000 for Construction and Cost Escalation.
- 2020: \$1,000,000 for Construction and Cost Escalation.
- 2021: \$5,000,000 for Construction and Cost Escalation.
- 2024: \$76,250,000 for Construction.

Justification

In 2006, the Long Term 2 Surface Water Treatment ("LT2") Rule established regulations which would require public water suppliers to provide enhanced disinfection treatment of drinking water to reduce potential for contamination from microbial organisms (cryptosporidium and giardia). This alternative connection will provide redundancy and protect against the loss of water in the event of a break in the pipe. Furthermore, the NYC DEP has announced that they will be conducting a series of shutdowns of the Delaware Aqueduct for maintenance. The southern connection portion of this project needs to be expedited in order to provide an alternate water source for the KB Pipeline when the Delaware Aqueduct water supply is unavailable.

Consistency with Programs or Plans

The project is consistent with the policies of "Westchester 2025", the County's long-range land use policies, in that it will maintain safe and environmentally sound systems and policies for water distribution and resource management.

Planning Board Analysis

PL2: The Planning Board acknowledges the importance of protecting drinking water supplies and maintaining those DEF facilities that provide and distribute drinking water. Plans should be coordinated with Planning Department staff to ensure that impacts to the sites and vicinities are kept to a minimum during the proposed work. Plans for the Kensico Dam site will be coordinated with any park improvements planned by the Parks Department.

RESOLUTION 23 8

WHEREAS, the Planning Board held a meeting on June 13, 2023 to discuss the draft report on the 2024 capital project requests; and

WHEREAS, any additional recommendations, comments and changes suggested by the Planning Board and contained within the minutes of the Planning Board's July 11, 2023 meeting shall be incorporated into the Planning Board Report on the 2024 Capital Project Requests; and
