Westchester County Board of Legislators
800 Michaelian Office Building
White Plains, New York 10601

Dear Members of the Board of Legislators:

Transmitted herewith for your review and approval is an amended bond act (the "Amended Bond Act") which, if adopted, would authorize the County of Westchester ("County") to issue additional bonds in the amount of \$6,000,000 to finance the following capital project:

RB04B – Boston Post Road Bridge over Playland Parkway, Rye (BIN 2000050) ("RB04B").

The Bond Act, in the total amount of \$6,925,000, which includes \$925,000 in previously authorized bonds of the County, would finance the cost of construction and construction management associated with the rehabilitation of the existing Boston Post Road bridge over Playland Parkway in the City of Rye, including the removal and replacement of the pavement, fill, sidewalks, and waterproofing membrane; rehabilitation of the concrete arch and stone facing; and associated work.

The Department of Public Works and Transportation ("Department") has advised that this bridge, which was built in 1941 and has an annual daily traffic count ("AADT") of 5,640, is in need of rehabilitation to maintain a safe roadway for the traveling public. In 2023, the New York State Department of Transportation gave the bridge a condition rating of 4.8 and the roadway has continued to deteriorate. This rating system, using a scale of 1 ("hazardous") through 7 ("new"), is a weighted average of the condition of an evaluated bridge. A rating below 5 indicates that a bridge requires work and delay of this work could result in the continued deterioration of the bridge.

Design is currently underway using outside consultants and is expected to be completed by the second quarter of 2025. It is anticipated that construction will take approximately twenty-four (24) months to complete and will begin after award and execution of the construction contracts.

It should be noted that your Honorable Board has previously authorized the County to issue bonds for RB04B as follows: Bond Act No. 6-2020 in the amount of \$925,000, which financed the cost of design for the replacement of this bridge. No bonds have been issued under Bond Act No. 6-2020. Accordingly, it is now requested that Bond Act No. 6-2020 be amended to increase the initial amount authorized by \$6,000,000, for a total authorized amount, as amended, of \$6,925,000, to modify and expand the scope of services to include construction and construction management associated with the rehabilitation of the bridge, and to increase the period of probable usefulness of said bonds.

Based on the importance of this project to the County, favorable action on the proposed Amended Bond Act is respectfully requested.

Sincerely,

A handwritten signature in black ink, appearing to be 'KWJ', with a long horizontal flourish extending to the right.

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of a transmittal from the Westchester County Executive recommending approval by the County of Westchester (“County”) of an amended bond act (the “Amended Bond Act”) in the total amount of \$6,925,000, which includes \$6,000,000 in previously authorized bond of the County, to finance capital project RB04B – Boston Post Road Bridge over Playland Parkway, Rye (BIN 2000050) (“RB04B”). The Bond Act, which was prepared by the law firm Harris Beach, PLLC, will finance the cost of construction and construction management associated with the rehabilitation of the existing Boston Post Road bridge over Playland Parkway in the City of Rye, including the removal and replacement of the pavement, fill, sidewalks, and waterproofing membrane; rehabilitation of the concrete arch and stone facing; and associated work.

The Department of Public Works and Transportation (“Department”) has advised that this bridge, which was built in 1941 and has an annual daily traffic count (“AADT”) of 5,640, is in need of rehabilitation to maintain a safe roadway for the traveling public. In 2023, the New York State Department of Transportation gave the bridge a condition rating of 4.8 and the roadway has continued to deteriorate. This rating system, using a scale of 1 (“hazardous”) through 7 (“new”), is a weighted average of the condition of an evaluated bridge. A rating below 5 indicates that a bridge requires work and delay of this work could result in the continued deterioration of the bridge.

Design is currently underway using outside consultants and is expected to be completed by the second quarter of 2025. It is anticipated that construction will take approximately twenty-four (24) months to complete and will begin after award and execution of the construction contracts.

Your Committee notes that your Honorable Board has previously authorized the County to issue bonds for RB04B as follows: Bond Act No. 6-2020 in the amount of \$925,000, which financed the cost of design for the replacement of this bridge. No bonds have been issued under Bond Act No. 6-2020. Accordingly, it is now requested that Bond Act No. 6-2020 be amended to increase the initial amount authorized by \$6,000,000, for a total authorized amount, as amended, of \$6,925,000, to modify and expand the scope of services to include construction and construction management associated with the rehabilitation of the bridge, and to increase the period of probable usefulness of said bonds.

The Planning Department has advised your Committee that based on its review, the above-referenced capital project may be classified as a Type "II" action pursuant to the State Environmental Quality Review Act ("SEQR") and its implementing regulations, 6 NYCRR Part 617. Therefore, no further environmental review is required. Your Committee has reviewed the annexed SEQR documentation and concurs with this recommendation.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Amended Bond Act. Your Committee recommends the adoption of the proposed Amended Bond Act.

White Plains, New York 10601

Dear Honorable Members of the Board of Legislators:

Transmitted herewith for your review and approval is an amended bond act (the "Amended Bond Act") which, if adopted, would authorize the County of Westchester ("County") to issue additional bonds in the amount of \$700,000 to finance the following capital project:

RBR07 – Bronx River Pathway Reconstruction ("RBR07").

The proposed Amended Bond Act, in the total amount of \$9,430,000 dollars, which includes \$8,730,000 in previously authorized bonds of the County, is necessary to finance the cost of design associated with the reconstruction of the Bronx River Pathway from Crane Road South to Scout Field.

The Department of Parks Recreation and Conservation ("Department") has advised that according to a recent recreation preference survey, walking and bicycling continue to rank high among the top recreation activities enjoyed by Westchester County residents. The Bronx River Pathway, being the most heavily used pathway in the parks system, plays a critical role in supporting these activities. To maintain its popularity and usability, the Department is addressing the deterioration of older sections as part of a multi-year phased program aimed at rehabilitating the pathway.

Following bond authorization, design is anticipated to take eighteen (18) months to complete and will be performed by in-house staff and consultants. It is anticipated that construction will take approximately eighteen (18) months to complete and will begin after award and execution of the construction contracts, subject to your Honorable Board's further approval of construction funding for this section of the pathway.

It should be noted that your Honorable Board has previously authorized the County to issue bonds for RBR07 as follows: Bond Act No. 225-2024 in the amount of \$8,730,000, which financed the cost of design, construction and construction management of improvements to the Bronx River Reservation pathway from the Kensico Dam Plaza to Green Acres Avenue, including rehabilitation and improvements to all pathway infrastructure. No bonds have been issued under Bond Act No. 225-2024. Accordingly, it is now requested that Bond Act No. 225-2024 be amended to increase the amount authorized by \$700,000, for a total authorized amount, as amended, of \$9,430,000, and to expand the scope of services to include design associated with the reconstruction of the pathway from Crane Road South to Scout Field.

Based on the importance of this project to the County, favorable action on the annexed Bond Act is respectfully requested.

Sincerely,

Your Committee is in receipt of a transmittal from the County Executive recommending approval by the County of Westchester (“County”) of an amended bond act (the “Amended Bond Act”) in the total amount of \$9,430,000, which includes \$8,730,000 in previously authorized bonds of the County, to finance capital project RBR07 – Bronx River Pathway Reconstruction (“RBR07”). The Amended Bond Act, which was prepared by the law firm Hawkins, Delafield & Wood, is required to finance the cost of design associated with the reconstruction of the Bronx River Pathway from Crane Road South to Scout Field.

The Department of Parks Recreation and Conservation (“Department”) has advised that according to a recent recreation preference survey, walking and bicycling continue to rank high among the top recreation activities enjoyed by Westchester County residents. The Bronx River Pathway, being the most heavily used pathway in the parks system, plays a critical role in supporting these activities. To maintain its popularity and usability, the Department is addressing the deterioration of older sections as part of a multi-year phased program aimed at rehabilitating the pathway.

Following bond authorization, design is anticipated to take eighteen (18) months to complete and will be performed by in-house staff and a consultant. It is anticipated that construction will take approximately eighteen (18) months to complete and will begin after award and execution of the construction contracts, subject to your Honorable Board’s further approval of construction funding for this section of the pathway.

It should be noted that your Honorable Board has previously authorized the County to issue bonds for RBR07 as follows: Bond Act No. 225-2024 in the amount of \$8,730,000, which financed the cost of design, construction and construction management of improvements to the Bronx River Reservation pathway from the Kensico Dam Plaza to Green Acres Avenue, including rehabilitation and improvements to all pathway infrastructure. No bonds have been issued under Bond Act No. 225-2024. Accordingly, it is now requested that Bond Act No. 225-2024 be amended to increase the amount authorized by \$700,000, for a total authorized amount, as amended, of \$9,430,000, and to expand the scope of services to include design associated with the reconstruction of the pathway from Crane Road South to Scout Field.

The Department of Planning has advised your Committee that based on its review, RBR07 may be classified as a Type "II" action pursuant to the State Environmental Quality Review Act and its implementing regulations, 6 NYCRR Part 617 ("SEQR"). Therefore, no further environmental review is required. Your Committee has reviewed the annexed SEQR documentation and concurs with this recommendation.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Amended Bond Act. Your Committee has carefully considered the Amended Bond Act and recommends approval of same.

Westchester County Board of Legislators
800 Michaelian Office Building
White Plains, New York 10601

Dear Members of the Board of Legislators:

Transmitted herewith for your review and approval is an amended bond act (the "Amended Bond Act"), which, if adopted, would authorize the County of Westchester (the "County") to issue an additional \$40,092,000 in bonds of the County to finance the following capital project:

RP02A – Ice Casino Improvements II ("RP02A").

The Amended Bond Act, in the total amount of \$58,789,000, which includes \$18,697,000 in previously authorized bonds of the County, would fund the cost of construction and construction management associated with the complete rehabilitation of the Ice Casino Building at Playland Park in Rye.

The Department of Parks, Recreation & Conservation (the "Department") has advised that the improvements to the Ice Casino will include structural rehabilitation of the facility's second floor Studio Rink, replacement of roofing over the Studio Rink, rehabilitation of the facility's locker room wing, replacement of roofing over the locker rooms, along with associated mechanical, electrical and ADA improvements. The project will also include restoration of the building's historic front façade, as well as rehabilitation of the building's rear and side façades.

The Department has advised that the Ice Casino is an integral contributing historic element of Playland Park and helps define Playland's landmark status. Furthermore, the structure is in dire need of exterior restoration along with structural, weather tightness and mechanical rehabilitation and upgrades in order to continue to serve the public.

Your Honorable Board is advised that design, which was performed by an outside consultant, is complete. It is estimated that construction will take twenty-eight (28) months to complete and will begin after award and execution of the construction contracts.

It should be noted that your Honorable Board has previously authorized the County to issue bonds in connection with RP02A, as follows: Bond Act No. 2022-30 in the amount of \$18,697,000, which financed the cost of design, construction and construction management associated with the first phase of the building improvements for the Ice Casino, as well as the cost of design for the second phase of the building improvements for the Ice Casino. \$1,355,472 in bonds have been issued under Bond Act

No. 2022-30. Accordingly, authority of your Honorable Board is now requested to amend Bond Act No. 2022-30 to increase the initial amount authorized by \$40,092,000, for a new total authorized bonding amount of \$58,789,000.

It should be noted that in addition to the amount financed under the Amended Bond Act, the County has received \$350,000 in Federal COVID-19 grant funding for this project.

Based on the importance of this capital project to the County, favorable action on the annexed proposed Amended Bond Act is most respectfully requested.

Sincerely,

A handwritten signature in black ink, appearing to read 'KWJ', with a long horizontal line extending to the right.

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of a transmittal from the County Executive recommending approval of an amended bond act (the “Amended Bond Act”), in the total amount of \$58,789,000, which includes \$18,697,000 in previously authorized bonds of the County of Westchester (the “County”), to finance capital project RP02A – Ice Casino Improvements II (“RP02A”).

Your Committee is advised that the Bond Act, prepared by the law firm of Hawkins Delafield and Wood, LLP, would fund the cost of construction and construction management associated with the complete rehabilitation of the Ice Casino Building at Playland Park in Rye.

The Department of Parks, Recreation & Conservation (the “Department”) has advised that the improvements to the Ice Casino will include structural rehabilitation of the facility’s second floor Studio Rink, replacement of roofing over the Studio Rink, rehabilitation of the facility’s locker room wing, replacement of roofing over the locker rooms, along with associated mechanical, electrical and ADA improvements. The project will also include restoration of the building’s historic front façade, as well as rehabilitation of the building’s rear and side façades.

Your Committee is advised that the Ice Casino is an integral contributing historic element of Playland Park and helps define Playland’s landmark status. Furthermore, the structure is in dire need of exterior restoration along with structural, weather tightness and mechanical rehabilitation and upgrades in order to continue to serve the public.

Your Committee is further advised that design, which was performed by an outside consultant, is complete. It is estimated that construction will take twenty-eight (28) months to complete and will begin after award and execution of the construction contracts.

Your Committee notes that your Honorable Board has previously authorized the County to issue bonds in connection with RP02A, as follows: Bond Act No. 2022-30 in the amount of \$18,697,000, which financed the cost of design, construction and construction management associated with the first phase of the building improvements for the Ice Casino, as well as the cost of design for the second phase of the building improvements for the Ice Casino. \$1,355,472

in bonds have been issued under Bond Act No. 2022-30. Accordingly, authority of your Honorable Board is now requested to amend Bond Act No. 2022-30 to increase the initial amount authorized by \$40,092,000, for a new total authorized bonding amount of \$58,789,000.

Your Committee is advised that in addition to the amount financed under the Amended Bond Act, the County has received \$350,000 in Federal COVID-19 grant funding for this project.

The Planning Department has advised that RP02A would constitute a “Type I” Action under the State Environmental Quality Review Act and its implementing regulations 6 NYCRR, Part 617 (“SEQR”), which requires an appropriate environmental review. Your Committee has carefully considered the proposed legislation. It has reviewed the attached Full Environmental Assessment Form (Full EAF) and the criteria contained in Section 617.7 of Title 6 of the New York Codes, Rules and Regulations, the SEQR regulations, to identify the relevant areas of environmental concern. For the reasons set forth in the attached Full EAF, your Committee believes that the proposed action will not have any significant adverse impact on the environment and urges your Honorable Board to adopt the annexed resolution by which this Board would issue a Negative Declaration for this proposed action.

Your Committee is advised that an affirmative vote of two-thirds of the members of this Honorable Board is required in order to adopt the Amended Bond Act.

Your Committee has carefully considered the proposed Amended Bond Act and recommends approval thereof.

Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]	
Project:	Playland Ice Casino Improvements (RP02A)
Date:	April 2023

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

As the project involves primarily renovations to an existing building at a highly-developed/active recreational facility, there will be minimal impacts on the environment.

IMPACT ON LAND: Land disturbance will be limited to a small area on the north side of the building, which has already been disturbed and is surrounded by existing park-related development. Site work will not take more than a year.

IMPACTS ON WATER: Long Island Sound is located to the rear of the building and is set apart by a boardwalk and sea wall that will not be disturbed. Appropriate best management practices will be followed during construction to prevent any offsite contamination.

IMPACT ON FLOODING: All of Playland park is within the 100-year floodplain. The addition will serve to protect the facility's equipment from floodwaters by elevating it several feet above grade. The minor addition in the floodplain will have no downstream impacts since the facility is located on the coastline. Basement pumps will be replaced and another pump added to minimize flood impacts to the facility.

IMPACT ON PLANTS AND ANIMALS: Three of five trees that presently exist on the north side of the building will need to be removed to accommodate the proposed site improvements. As these are mature trees, the loss of tree canopy in the immediate area would be apparent. However, the park and adjoining Edith Read Sanctuary contain many mature trees. Nevertheless, nine new trees will be planted within the amusement park, as close to the project site as possible, to offset the proposed tree removals. The project will not have a significant impact on wildlife as it does not affect natural habitat.

IMPACT ON HISTORIC AND ARCHEOLOGICAL RESOURCES: In addition to being on the National Register of Historic Places, Playland Amusement Park has been designated a National Historic Landmark. The project will comply with the Secretary of the Interior's Standards for the Treatment of Historic Properties and will serve to restore and protect this historic facility. Restoration in place of in-kind replacement will be considered when viable, as requested by SHPO. No archaeological impacts are anticipated since ground disturbance will be minimal and affected areas have already been disturbed.

IMPACT ON OPEN SPACE AND RECREATION: The project will necessitate temporary closure of the ice casino for construction, which is anticipated to impact one ice skating season. The amusement park, beach, pool and boardwalk will not be affected by this project.

IMPACT ON CRITICAL ENVIRONMENTAL AREAS: Playland Amusement Park lies within two Critical Environmental Areas--Long Island Sound Shoreline and County and State Park Lands, which were designated by the County for a host of benefits, including: scenic, historical, recreational, ecological, cultural, social and educational. The project will serve to support most of these benefits.

Overall, the project will serve to restore/protect a prominent historic structure and popular recreational asset, while updating all systems including heating, plumbing, electrical, communication and fire suppression, improving energy efficiency, safety and accessibility. Replacement of the generator and oil tank and enclosure of the mechanical equipment will reduce exposure to the environment and extend the life of the equipment, minimizing consumption and waste.

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).
