

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of a transmittal from the County Executive recommending approval of a bond act (the "Bond Act") in the total aggregate amount of \$1,100,000 to authorize the County of Westchester (the "County") to finance the following two (2) capital projects:

RGP15 - General Infrastructure – Fuel Tank Replacement (2024-2028)

RGP16 - General Infrastructure – Roofing Systems (2024-2028)

Your Committee is advised that the Bond Act, prepared by the law firm of Harris Beach PLLP, would authorize the County to issue bonds in the total amount of \$1,100,000 to finance the study, design, construction management and construction associated with the following projects required by the Department of Parks, Recreation and Conservation ("Department"), including:

- (i) Removal and/or replacement of fuel storage tanks and related distribution system piping, equipment, remediation and related infrastructure and site work for fuel tank systems located at Glenn Island Park, Muscoot Farm, Sprain Ridge Golf Course and other County parks. This study will consider the potential for transitioning to alternative energy infrastructure where possible and practical.
- (ii) Repair and/or replacement of existing roofs and associated building renovations and site work at the Lenoir Preserve (Maintenance Garage), Macy Park (Astapycyk Residence), Croton Point Park (Recreation Hall) and other building roofs in the County Park System.

Your Committee is advised that the anticipated cost estimates, anticipated project timeline, and whether the design is anticipated to be undertaken in-house or by consultants for each capital

project is set forth below:

BOND ACT – DPW REMOVAL, REPAIR AND/OR REPLACEMENT PROJECTS

Cap ID	Project	Anticipated Amount	Design Assignment	Time Frame (Months)	
				Design	Const
RGP15	Fuel Tank Replacement (2024-2028)	\$600,000	Staff and Consultant	8 months	12 months
RGP16	Roofing Systems (2024-2028)	\$500,000	Staff and Consultant	8 months	12 months
Total:		\$1,100,000			

Your Committee is advised that the proposed Bond Act authorizes financing for like objects or purposes in connection with multiple capital projects. It is hoped that by combining projects that have the same objects and purposes into a single bond act, the County can dramatically reduce the amount of bond legislation that your Honorable Board would be required to review, thereby expediting the approval process and avoiding backlogs.

Your Committee is further advised that the County Budget Department is submitting the proposed Bond Act to your Honorable Board simultaneously with the proposed 2024 Capital Budget. It is the County’s goal to submit the proposed Bond Act now so that the referenced projects will be ready to proceed without delay in early 2024.

The Planning Department has advised your Committee that based on its review, the above-referenced capital projects may be classified as a Type “II” action pursuant to the State Environmental Quality Review Act (“SEQR”) and its implementing regulations, 6 NYCRR Part 617. Therefore, no environmental review is required. Your Committee has reviewed the annexed SEQR documentation and concurs with this recommendation.

It should be noted that an affirmative vote of two-thirds of the members of your

Honorable Board is required in order to adopt the Bond Act. Your Committee recommends the adoption of the proposed Bond Act.

RGP15 General Infrastructure – Fuel Tank Replacement (2024-2028)**

PROJECT/ACTION: Per Capital Project Fact Sheet as approved by the Planning Department on 08-30-2023 (Unique ID: 2363)

With respect to the State Environmental Quality Review Act and its implementing regulations 6 NYCRR Part 617, the Planning Department recommends that no environmental review is required for the proposed action, because the project or component of the project for which funding is requested may be classified as a **TYPE II action** pursuant to section(s):

- **617.5(c)(2):** replacement, rehabilitation or reconstruction of a structure or facility, in kind, on the same site, including upgrading buildings to meet building, energy, or fire codes unless such action meets or exceeds any of the thresholds in section 617.4 of this Part;
- **617.5(c)(27):** conducting concurrent environmental, engineering, economic, feasibility and other studies and preliminary planning and budgetary processes necessary to the formulation of a proposal for action, provided those activities do not commit the agency to commence, engage in or approve such action.

COMMENTS: The initial work involves a study of existing fuel tanks at park facilities, which may be classified as Type II. Subsequent work will involve the design and construction for the replacement of existing fuel storage and dispensing systems to meet current regulations and policies, including bringing underground tanks above ground in the same vicinity or within the developed areas of an existing maintenance yard, which may also be classified as Type II. However, any work involving construction in new or undeveloped areas or involving new off-site infrastructure would require further environmental review prior to authorizing construction.
