

RESOLUTION 13 - 2024  
(BOND) ACT 28 - 2024  
ACT 29 - 2024

Reference RGI04

**HONORABLE BOARD OF LEGISLATORS  
THE COUNTY OF WESTCHESTER, NEW YORK**

TEMPORARY  
EASEMENT AGREEMENT  
ON FILE

Your Committee is in receipt of an amended bond act (“Amended Bond Act”) in the total amount of \$58,000,000, which includes \$5,175,000 in previously authorized bonds of the County of Westchester (“County”), to finance Capital Project RGI04 - Glen Island Bridge Rehabilitation III (“RGI04”). Your Committee is also in receipt of an act (the “Act”) that would authorize the County to acquire a temporary easement from the City of New Rochelle (the “City”) over approximately twenty-three thousand (23,000) square feet of property located adjacent to New Rochelle Harbor (the “Property”), in order to facilitate the rehabilitation of the Glen Island Bridge (the “Bridge”) and provide the County with a financeable property interest for the issuance of County bonds.

The Amended Bond Act, which was prepared by the law firm Hawkins Delafield & Wood, LLP, is required to finance the cost of construction and construction management associated with the removal and replacement of the bridge deck, sidewalk and handrails, lighting, traffic warning signs and gates, painting of bridge superstructure, as well as the electromechanical and counterweight systems for both fixed and bascule sections and spans. The Amended Bond Act will also finance the cost of construction and construction management of a temporary bridge which will provide access to Glen Island while the Bridge is being repaired.

The Department of Parks, Recreation and Conservation (the “Department”) has advised that the Bridge provides sole access from the mainland to Glen Island, which includes Glen Island Park and the Glen Island Harbour Club. The County is required by the U.S. Coast Guard to operate and maintain the Bridge, which also allows access through the channel. The Bridge is an original component of the 1925 development of Glen Island by the County Park Commission. Structural engineering reports by the Department of Public Works and Transportation indicate an urgent need to rehabilitate the Bridge.

Your Committee is advised that the Act will authorize the County to acquire a temporary easement from the City over the Property in order to facilitate the rehabilitation of the Bridge, including the construction of the temporary bridge, and provide the County with a financeable property interest for the issuance of County bonds.

Your Committee is advised that design is complete and that construction is estimated to take thirty (30) months to complete and will begin after award and execution of the construction contracts.

Your Committee notes that your Honorable Board has previously authorized the County to issue bonds to finance RGI04, as follows: Bond Act No. 122-2019 in the amount of \$1,050,000, which funded design of the replacement of the bridge deck and above deck elements, as well as all associated infrastructure; and Bond Act No. 86-2022, which amended Bond Act No. 122-2019 to increase the initial amount authorized thereunder by \$4,125,000, to a new total amount authorized of \$5,175,000 and revised the scope of the project to include additional design services associated with the bridge rehabilitation and the temporary bridge. \$492,830 in bonds under Bond Act No. 86-2022 have been sold. Accordingly, authority is now requested to further amend Bond Act No. 122-2019, as amended by Bond Act No. 86-2022, to increase the total amount of bonds authorized from \$5,175,000 to \$58,000,000, to revise the scope of Bond Act No. 122-2019, as amended, to include work associated with the construction phase of RGI04, and to increase the period of probable usefulness of said bonds.

The Planning Department has advised your Committee that based on its review, RGI04 has been classified as an “Unlisted” action under the State Environmental Quality Review Act (“SEQR”), which requires an appropriate environmental review. Your Committee has carefully considered the proposed legislation. It has reviewed the attached Short Environmental Assessment Form (EAF) and the criteria contained in Section 617.7 of Title 6 of the New York Codes, Rules and Regulations, the SEQRA regulations, to identify the relevant areas of environmental concern. For the reasons set forth in the attached EAF, your Committee believes that the proposed action will not have any significant adverse impact on the environment and urges your Honorable Board to adopt the annexed resolution by which this Board would issue a Negative Declaration for this proposed action.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Amended Bond Act, while an affirmative vote of a majority of the voting strength of your Honorable Board is required to adopt the Act authorizing the temporary easement.

Your Committee recommends the adoption of the proposed Amended Bond Act and the Act authorizing the acquisition on the temporary easement.

## **RESOLUTION 13 - 2024**

**WHEREAS**, there is pending before this Honorable Board an amended bond act and an act authorizing the County to acquire a temporary easement over property belonging to the City of New Rochelle in connection with Capital Project RGI04 – Glen Island Bridge Rehabilitation III (the “Project”); and

**WHEREAS**, this Honorable Board has determined that the proposed Project would constitute an action under Article 8 of the Environmental Conservation Law, known as the New York State Environmental Quality Review Act (“SEQR”); and

**WHEREAS**, pursuant to SEQR and its implementing regulations (6 NYCRR Part 617), this project is classified as an “Unlisted action,” which requires this Honorable Board to make a determination as to whether the proposed action will have a significant impact on the environment; and

**WHEREAS**, the County of Westchester is conducting uncoordinated review as permitted for Unlisted Actions pursuant to Section 617.6(b)(4) of the implementing regulations for the environmental review of this project; and

**WHEREAS**, in accordance with SEQR and its implementing regulations, a Short Environmental Assessment Form has been prepared to assist this Honorable Board in its environmental assessment of this proposed action; and

**WHEREAS**, this Honorable Board has carefully considered the proposed action and has reviewed the attached Short Environmental Assessment Form and the criteria set forth in Section 617.7 of the implementing regulations and has identified the relevant areas of environmental concern, as described in the attached Short Environmental Assessment Form, to determine if this proposed action will have a significant impact on the environment.

**NOW, THEREFORE**, be it resolved by the County Board of Legislators of the County of Westchester, State of New York, as follows:

**RESOLVED**, that based upon the Honorable Board’s review of the Short Environmental Assessment Form and for the reasons set forth therein, this Board finds that there will be no significant adverse impact on the environment from the Project; and be it further

**RESOLVED**, that the Clerk of the Board of Legislators is authorized and directed to sign the “Determination of Significance” in the Short Environmental Assessment Form, which is attached hereto and made a part hereof, as the “Responsible Officer in Lead Agency”; to issue this “Negative Declaration” on behalf of this Board in satisfaction of SEQR and its implementing regulations; and to immediately transmit same to the Commissioner of Planning to be filed, published and made available pursuant to the requirements of Part 617 of 6 NYCRR; and be it further

**RESOLVED**, that the Resolution shall take effect immediately.

### Part 1 - Project Information

#### Instructions for Completing

**Part 1 – Project Information.** The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

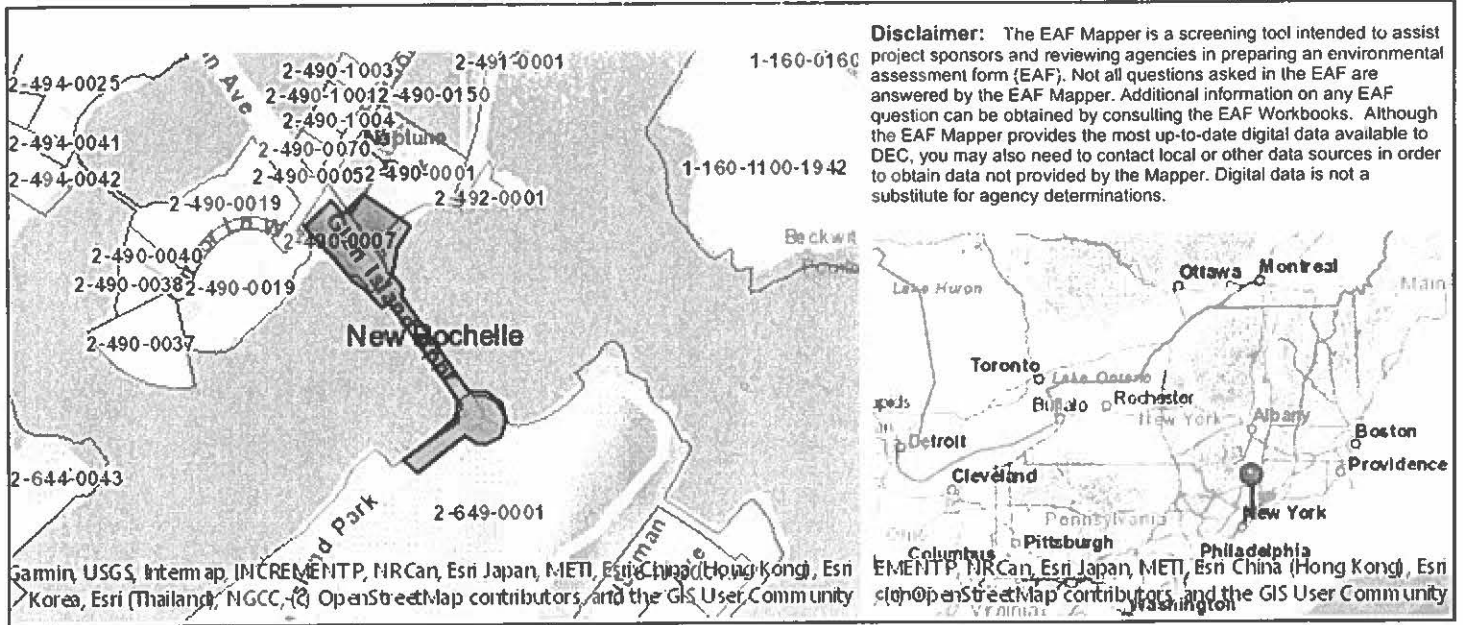

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

<b>Part 1 – Project and Sponsor Information</b>				
Name of Action or Project: Glen Island Bridge Rehabilitation (RGI04)				
Project Location (describe, and attach a location map): Glen Island Approach over New Rochelle Harbor, New Rochelle, Westchester County, NY				
Brief Description of Proposed Action: Proposed work includes: removal and replacement of the bridge deck, sidewalks, handrails, lighting, traffic warning signs and gates, electro-mechanical and counterweight systems for both fixed and bascule spans; painting the bridge superstructure; replacement of the cross bracing, frames, main girders, bearings; repairs to the masonry piers, abutments; and painting of immersed substructure steel. A temporary bridge will be installed on the north side of the existing bridge to allow a long-term shutdown of the existing bridge without interrupting normal traffic flow. This will require a temporary easement over property belonging to the City of New Rochelle as well as temporary relocation of some of the parking spaces on this property. The temporary bridge structure will have a movable span to continue to allow for marine traffic passage. In addition, a submarine cable running underneath the bridge will be replaced. The cable supplies electrical power and communications signals for the Glen Island Bridge. A new fiber optic line will be included within the cable to serve the Parks Department building on the island. The project will also provide for renovations to the existing control house, including upgrading of the kitchenette and restroom facilities, along with a new sewer connection.

Date: January 2024

### Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The project will not have a significant impact on the environment as it entails replacement in kind and any adjacent areas disturbed during construction will be restored following completion of the project. Major rehabilitation is necessary in order to keep the bridge safe and functional. It is the sole access to Glen Island, a heavily used County park with a catering hall in Long Island Sound.

The bridge was built in the 1920s. Although not listed, it is eligible for listing on the National Register of Historic Places. As directed by State Historic Preservation Office, all components for replacement will match existing or be as close as feasible and any alternative materials will match the existing in size, configuration and finish as is feasible.

The original piers for the existing bridge will be rehabilitated. In-water impacts will be limited to the installation of temporary piers for the temporary bridge and some disturbance of bottom sediments/substrate for the replacement of the submarine cable across the channel. Standards and specifications will be followed for erosion and sedimentation control, as well as for construction debris and hazardous materials containment while working in/over the water. Measures include bio-fiber rolls, turbidity curtains, geotextile fabric, platforms, nets and screens. Impacts will also be minimized by timing restrictions. Work below mean high water will be limited to periods of low tide. Benthic disturbances will be limited to October 1 through January 15 to protect summer and winter flounder. All construction materials will be removed and the site restored to preexisting conditions following project completion.

The temporary easement is for the use of approximately a half acre of city property on neighboring Neptune Island to provide for a temporary access bridge and staging area during construction. The property consists of an informal row of bordering trees, a sloping lawn and a level area of gravel parking which serves the City's Neptune Park. The trees are of varying sizes and many are non-native. Tree removals will be replaced with native species. Temporary surface improvements (crushed gravel) will be made to the northwest corner of the city property, which is comprised of compacted dirt, to provide for the temporary relocation of approximately 20 parking spaces. The entire easement area will be restored to its original or slightly better condition. Therefore, there will be no significant impact in connection with the temporary use of City property.

The new sewer line, which will just serve the control house, will be installed within the Glen Island Approach roadway to the nearest sewer main located at the intersection with Harbor Lane/Neptune Island Road. The new fiber optic line will essentially run along the curb line of the access road and utilize microtrenching with HDPE ducts installation. As such, these installations will not have a significant impact on the environment.

The project site is within two County-designated Critical Environmental Areas (CEAs)--(1) Long Island Sound (LIS) and (2) County and State Park Lands. Impacts to the waters of LIS will be temporary and carefully mitigated. The temporary bridge will allow for continued use of this highly popular park during the extended project duration. Overall, the project will benefit the public and the environment by rectifying a hazardous structure, restoring all disturbed areas to renewed condition, and ensuring continued enjoyment of Glen Island Park for years to come.

- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
