

RESOLUTION 22 - 2025  
ACT 56 - 2025  
(BOND) ACT 57 - 2025

Reference RWPR5

**HONORABLE BOARD OF LEGISLATORS  
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of a transmission from the County Executive recommending approval by the County of Westchester ("County") of an act amending the County's current-year capital budget ("Capital Budget Amendment"), as well as adoption of a related amended bond act ("Amended Bond Act") which, if adopted, will authorize the County to issue up to \$1,700,000 in bonds of the County to finance capital project RWPR5 – Ward Pound Ridge Reservation Fire Tower ("RWPR5").

Your Committee is advised that proposed Capital Budget Amendment will amend the County's capital budget to increase the County share for RWPR5 by \$900,000. The Department of Parks, Recreation and Conservation ("Department") has advised that the Capital Budget Amendment is necessary to fund construction of the fire tower at the County's Ward Pound Ridge Reservation ("Reservation").

The Amended Bond Act, in the total amount of \$1,700,000, which increases the amount authorized by \$1,400,000 and includes \$300,000 in previously authorized bonds of the County, would finance the cost of installation of a fire tower at Ward Pound Ridge Reservation and all associated site work. It should be noted that the estimated maximum cost of RWPR5 is \$1,800,000, which includes \$100,000 in non-County shares.

The Department has advised that that the financing is necessary to replace an iconic feature at the Reservation. The new fire tower will be installed at the site of the former fire tower, located on the highest point in the Reservation, which is 860 feet above sea level. The site is accessible via the Reservation's blue trail from the Kimberly Bridge picnic area and, once constructed, will be a fantastic destination point with spectacular views across the entire Reservation.

Design is currently being undertaken by a consultant and is expected to be completed by the second quarter of 2025. It is estimated that construction will take twelve months to complete and will begin after award and execution of the construction contracts.

It should be noted that your Honorable Board has authorized the County to issue bonds for RWPR5 as follows: Bond Act No. 188-2021 in the amount of \$300,000, which authorized

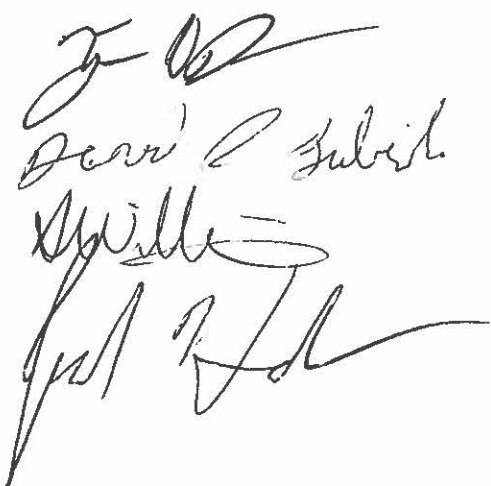

financing for installation of a fire tower at the Ward Pound Ridge Reservation and all associated site work. These bonds have not been sold. Accordingly, it is now requested that Bond Act No. 188-2021 be amended to increase the amount authorized by \$1,400,000, for a total authorized amount, as amended, of \$1,700,000.

The Planning Department has advised your Committee that based on its review, RWPR5 has been classified as an “Unlisted” action under the State Environmental Quality Review Act (“SEQR”). A Resolution, and proposed Negative Declaration, along with a full Environmental Assessment Form, prepared by the Planning Department, are attached to assist your Honorable Board in complying with SEQR. Upon review, your Committee concludes that the proposed action will not have any significant impact on the environment and recommends the adoption of the Resolution adopting the Negative Declaration. As you know, a determination of significance must be made prior to enacting the aforementioned Bond Act

Your Committee is advised that Section 167.131 of the County Charter mandates that a capital budget amendment that introduces a new capital project or changes the location, size or character of an existing capital project be accompanied to the Board of Legislators by a report of the Westchester County Planning Board (the “Planning Board”) with respect to the physical planning aspects of the project. Accordingly, the Planning Board report for RWPR5 is annexed.

Your Committee has carefully considered the proposed Capital Budget Amendment, as well as the related Amended Bond Act, and recommends approval of both of the proposed Acts, noting that the Bond Act can only be enacted following adoption of the Capital Budget Amendment. It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to amend the County's Capital Budget and to adopt the Amended Bond Act.

RE: **NO-ACTION MEMO - Capital Budget Amendment – RWPR5 Ward Pound Ridge Fire Tower (2025 CBA)**

The County Executive is requesting an amendment to the 2025 Capital Budget to modify the funding of the above project. Capital project **RWPR5 Ward Pound Ridge Fire Tower (2025 CBA)** will increase the County share for RWPR5 by \$900,000. The Department of Parks, Recreation and Conservation has advised that the Capital Budget Amendment is necessary to fund construction of the fire tower at the County's Ward Pound Ridge Reservation.

The Amended Bond Act, in the total amount of \$1,700,000, which includes \$300,000 in previously authorized bonds of the County, would finance the cost of installation of a fire tower at Ward Pound Ridge Reservation and all associated site work.

This project was classified as a PL2 in the Planning Board Report for the 2020 Capital Budget adopted February 4, 2020.

There are no substantial changes to the physical planning aspects of this project as reviewed by the Board; therefore, no further action by your Board is necessary.

Name of Action or Project: Ward Pound Ridge Reservation Fire Tower		
Project Location (describe, and attach a general location map): Highest point located in the southeast section of Ward Pound Ridge Reservation, Town of Pound Ridge, Westchester County		
Brief Description of Proposed Action (include purpose or need): Installation of a new fire tower at the same location where one once stood at the County park. The new fire tower will be approximately 110 feet tall and will be used for public viewing. The base of the tower will be approximately 22 feet square and will consist of galvanized steel members, founded on a concrete foundation anchored to bedrock. An existing dirt path from Pell Hill to the top of the mountain, which previously served as a driveway to the original fire tower, will be used for construction access. The path, which has since served as a hiking trail, will require some minor improvements, such as the placement of gravel in several small sections, to level off and provide sufficient width to accommodate construction vehicles.

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Agency Use Only [If applicable]	
Project :	RWPR5 Fire Tower
Date :	February 2025

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

The proposed fire tower will have minimal environmental impacts since it will be placed in the same location as the original fire tower, which remains an open area with scenic views and is accessible via an old access drive that now serves as a trail for park visitors to hike to the top. Exposed bedrock is found throughout the project site. Rock impacts will be limited to the anchoring of the new tower, which will consist of four concrete foundation piers, each being only 18 inches square, that will be secured to the bedrock with rods.

The only other disturbance will be to the old access drive, much of which will be on some degree of slope, which will require some improvements to minimize impacts associated with the use of construction vehicles during installation. The improvements will include the removal of ditches and laying of fresh gravel to prevent erosion and control stormwater runoff. Some sections may need slight widening and vegetation to be pruned back to provide adequate clearance for construction equipment, but this will be limited to the immediate area of the existing access drive and there will be no significant impact to the acidic talus slope woodlands.

At 110 feet tall on the highest point of the park, the top of the tower is likely to be seen from other locations. However, it's visibility will be diminished by distance, since the tower site is located 2,000 feet or more from the park boundaries, and limited by the surrounding mature forest. The tower will taper to a 9-foot square observation deck with a hip roof, reminiscent of old fire towers. Galvanized steel will weather to a dull gray finish. Lighting of the structure is not required by FAA; therefore, the tower will not be lit and there will be no nighttime impacts. A 155-foot cellular tower is located approximately 1.5 miles to the southeast.

Archaeological resources at the park will not be impacted as none of the known sites are within or adjacent to the project areas and the project will only affect areas that have previously been disturbed.

The project will enhance the recreational component of the park's CEA designation.

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the  
County of Westchester, acting by and through its Board of Legislators, \_\_\_\_\_ as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
