

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of a transmittal from the County Executive recommending approval by the County of Westchester ("County") of a bond act ("Bond Act") in the amount of \$800,000 to finance capital project RCG03 – Stokes Greene Building Demolition ("RCG03"). The Bond Act, which was prepared by the law firm Harris Beach, PLLC, would fund design, construction and construction management associated with the demolition, removal and associated site work of derelict building structures located at the Stokes Greene property adjacent to Croton Gorge Park in Croton-on-Hudson.

The Department of Parks, Recreation and Conservation ("Department") has advised that that there are six derelict building structures located on the Stokes Greene property that pose a safety hazard to the public and require demolition. The project will also include associated removals, such as hazardous materials, asphalt paving, concrete and fallen trees. All disturbed areas will be restored with topsoil and seeded.

Your Committee notes that in accordance with Section 249.101 (3) of the Laws of Westchester County, the Parks Commissioner has the right, subject to your Honorable Board's approval, to demolish or remove any buildings or structures required for park purposes. Approval of the proposed Bond Act will satisfy the requirements of this law.

Your Committee is advised that following bonding authorization, design will be scheduled and is anticipated to take three (3) months to complete and will be performed by outside consultants. It is estimated that construction will take six (6) months to complete and will begin after award and execution of the construction contracts.

The Planning Department has advised that, based on its review, this project falls within the definition of an "Unlisted" action under Article 8 of SEQRA and its implementing regulations 6 NYCRR Part 617, which requires an assessment of environmental impacts. Your Committee has carefully considered the proposed legislation. It has reviewed the attached Short Environmental Assessment Form ("EAF") and the criteria contained in Section 617.7 of the SEQRA regulations, to identify the relevant areas of environmental concern. For the reasons set forth in the attached

EAF, your Committee believes that the proposed action will not have any significant adverse impact on the environment and urges your Honorable Board to authorize the clerk to sign the attached EAF signifying that the proposed action will not result in any significant adverse environmental impacts.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Bond Act. Your Committee recommends the adoption of the proposed Bond Act.

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The Stokes-Greene property was formerly a 120-acre residential estate, containing a main house and multiple accessory buildings to the north and undeveloped lands to the south. Approximately 101 acres were dedicated as parkland and became part of Croton Gorge County Park. Approximately 10 acres on the northeast side was subsequently acquired by the City of New York for protection of the water supply. The remaining acreage at the north end, including the main house and many of the accessory buildings, was retained as general municipal land.

In 2015, the main house was destroyed by fire. This project will remove the ancillary structures on the property that have fallen into disrepair and currently pose a safety hazard. Structures to be removed include the former carriage house, barn, greenhouse, round shed, welding shop, as well as various paved pathways and concrete fixtures. Following demolition, the site will be graded over and seeded with native grasses.

The County of Westchester designated all County and State parklands as Critical Environmental Areas for the variety of benefits they provide, including recreational, educational, social, cultural and ecological benefits. This project will support these benefits by removing hazardous structures on public property that is adjacent to and accessible from County parkland.

The project occurs within an area where Bald Eagles, a New York State threatened species, may be encountered. However, as the project involves no activities that will result in the removal of trees, disturbance of nests or taking of any animals, the project will have no impact on Bald Eagles.

The property contains wetlands located on the National Wetlands Inventory, including two riverine wetlands, one pond area and its associated shrub wetlands. All activities will occur over 300 feet away from the nearest wetland. As these activities revert the site to a more natural state, the project will result in no impacts to these wetlands.

Because the project involves only restorative activities and will not impact any of the listed areas of concern, the project has been determined to have no significant adverse impact on the environment.

- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
