

RESOLUTION 138 - 2024
(BOND) ACT 135 - 2024

Reference RGM01

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of an amended bond act ("Amended Bond Act") in the total amount of \$3,850,000, which includes \$350,000 in previously authorized bonds of the County of Westchester ("County"), to finance Capital Project RGM01 - Mohansic Maintenance Facility ("RGM01").

The Amended Bond Act, which was prepared by the law firm Harris Beach, PLLC, is required to finance the cost of construction and construction management associated with the replacement of the existing electrical service into the park with a new three-phase electrical service. It will also provide additional funding for the design of the rehabilitation of the maintenance and storage building complex.

The Department of Parks, Recreation and Conservation (the "Department") has advised that upgrading to three-phase electrical service will enhance the park's electrical capacity, allowing for improved energy efficiencies in buildings and appliances, while reducing the County's dependence on fossil fuels. The Department has further advised that additional design funding is needed for the new maintenance and storage building complex. Since most of the existing buildings throughout the course are original to the site and built over 80 years ago, all improvements must be designed in a manner complimentary to the architectural character of the golf course.

Your Committee is advised that design is underway and is anticipated to take six (6) months to complete and is being performed by in-house staff. It is estimated that construction will take twelve (12) months to complete and shall begin after award and execution of the construction contracts.

Your Committee notes that your Honorable Board has previously authorized the County to issue bonds to finance RGM01, as follows: Bond Act No. 45-2015 in the amount of \$350,000, which funded design associated with the new maintenance and storage building complex. These bonds have not been sold. Accordingly, authority is now requested to amend Bond Act No. 45-2015 to increase the initial amount authorized by \$3,500,000, from \$350,000 to \$3,850,000, to revise the scope of Bond Act No. 45-2015 to include construction and construction management associated with the replacement of the existing electrical service into the park, and to increase the period of probable usefulness of said bonds.

The Planning Department has advised your Committee that based on its review, RGM01 has been classified as an "Unlisted" action under the State Environmental Quality Review Act ("SEQR"), which requires an appropriate environmental review. Your Committee has carefully considered the proposed legislation. It has reviewed the attached Short Environmental Assessment Form (EAF) and the criteria contained in Section 617.7 of Title 6 of the New York Codes, Rules and Regulations, the SEQRA regulations, to identify the relevant areas of environmental concern. For the reasons set forth in the attached EAF, your Committee believes that the proposed action will not have any significant adverse impact on the environment and urges your Honorable Board to adopt the annexed resolution by which this Board would issue a Negative Declaration for this proposed action.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Amended Bond Act. Accordingly, your Committee recommends the adoption of the proposed Amended Bond Act.

	No, or small impact may occur	Moderate to large impact may occur
1. Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Will the proposed action result in a change in the use or intensity of use of land?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

4. Will the proposed action have an impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
5. Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
6. Will the proposed action cause an increase in the use of energy and it fails to incorporate reasonably available energy conservation or renewable energy opportunities?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7. Will the proposed action impact existing:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

10. Will the proposed action result in an increase in the potential for erosion, flooding or drainage problems?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
11. Will the proposed action create a hazard to environmental resources or human health?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Extension of electrical utilities by Consolidated Edison, Inc. to the entrance of the Golf Course will involve only the hanging of wires on existing utility poles and related tree maintenance and will not have any significant impact on the environment. Installation of electrical service within the facility will involve minor trenching and the installation of conduit, tap boxes and a transformer in previously cleared areas immediately adjacent to existing driveways and facilities. Existing surface conditions will be restored following the installation of utilities. The project will involve no tree removal or grading and will create no new impervious surface.

The project is located adjacent to the Taconic State Parkway and near Franklin D. Roosevelt State Park, both of which are listed on the National Register of Historic Places. However, as the project involves only the installation of underground utilities and modification of existing overhead utilities at an off-site location, the project will have no significant impact to historic resources. The area has also been designated as sensitive for archaeological resources, but there will be no significant impact as all trenching will be shallow and occur in previously disturbed areas near driveways.

Wetlands are located near the project site on the opposite side of the Taconic State Parkway. As the project involves no work within these wetlands, involves no grading and will not create or alter storm water flows, the project will have no significant impact to these wetlands.

The Consolidated Edison, Inc. portion of the project involves the installation of overhead electrical cables that will hang above a floodplain. However, as these power cables are elevated on existing poles and will run alongside existing utility lines, there will be no significant impact to floodplain characteristics.

The project is located in an area designated as sensitive to Bald Eagles, a threatened species. However, as the project involves no tree removal or significant disturbance of vegetation beyond maintenance already planned by Consolidated Edison, Inc., there will be no significant impact to endangered species.

The project is located within the County and State Park Lands Critical Environmental Area, which was designated to require additional review for potentially incompatible developments adjacent to County Parks. As this project will directly serve and benefit the operations of the golf course, it will have no significant impact to the Critical Environmental Area.

Overall, the project will benefit users and staff of this County Park by meeting the rising demand for electricity and will allow for additional electrification of the facility and its equipment. Replacing aerial electrical cables with underground cables will also improve system resilience during storms. As the project involves only minor trenching and equipment installation in previously disturbed areas, and because all disturbed areas will be restored to their existing conditions, this project will have no significant adverse impact to the environment.

- ☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- ☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
