(8) Acquisition of equipment, servers, data storage, software, and services required to replace the existing VPI and NICE Systems with a solution technologically able to meet and exceed the County's Critical Communication Logging System's needs.

Your Honorable Board is advised that the anticipated cost estimates and anticipated project timeline for each capital project is set forth below:

Cap ID	Anticipated Amount	Time Frame (Months) for Purchase and Implementation
BIT3D (2728) Desktop Systems 2025-2029	\$1,840,000.00	11 Months

BIT52 (3121) Network and Security Infrastructure Upgrades 2025-2029	\$800,000.00	11 Months
BIT54 (3116) Critical Communication Logging System Replacement 2021-2025	\$500,000.00	11 Months
BIT56 (3117) Business Continuity 2026-2030	\$350,000.00	12 Months
BIT58 (3118) Critical Communication Logging System Replacement 2026-2030	\$350,000.00	11 Months
Total	\$7,465,000.00	

Your Committee is advised that the proposed Bond Act authorizes financing for like objects or purposes in connection with multiple capital projects. It is hoped that by combining projects that have the same objects and purposes into a single bond act, the County can reduce the amount of bond legislation that your Honorable Board would be required to review, thereby expediting the approval process and avoiding backlogs.

The Planning Department has advised your Committee that based on its review, the above-referenced capital projects may be classified as Type "II" actions pursuant to the State Environmental Quality Review Act and its implementing regulations, 6 NYCRR Part 617 ("SEQR"). Therefore, no environmental review is required. Your Committee has reviewed the annexed SEQR documentation and concurs with this recommendation.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Bond Act. Your Committee recommends the adoption of the proposed Bond Act.

An important part of the Department of Information Technology's mission is dedicated to implementing and supporting information systems and technologies that enhance the efficiency and effectiveness of all Westchester County departments and stakeholder agencies. This project aims to improve information accessibility while maintaining high levels of risk mitigation and security by recovery solutions. The volume of data in our Cyber Vault is increasing, and the various hardware, software and communication components including UPS Systems supporting our Business Continuity and Disaster Recovery efforts will reach their end of life by 2030. This project combines on-premise and cloud solutions to provide flexibility, allowing the best environment for each workload.

Overall Project Description

The Department of Information Technology's Server Group and Telecom Group currently supports the communication logging system which is comprised of thirty six (36) Server based systems along with their related applications and software providing audio recording capabilities for several county departments. Many of these departments, such as Emergency Services and Public Safety are mandated to store and maintain recordings of all of their operational transactions. These Audio Recordings and their metadata are comprised of individual archival records, some of which have a retention requirement of 21 years. The current communication logging systems are end of life and are no longer supported and need the ability to keep up with the increased demands and changes of the Federal Radio frequency spectrum.
