Westchester County Board of Legislators
800 Michaelian Office Building
White Plains, New York 10601

Dear Members of the Board of Legislators:

Transmitted herewith for your review and approval is an amended bond act (the "Amended Bond Act") which, if adopted, would authorize the County of Westchester ("County") to issue additional bonds in the amount of \$10,700,000 to finance capital project RGM01 - Mohansic Maintenance Facility ("RGM01").

The Amended Bond Act, in the total amount of \$14,550,000, which includes \$3,850,000 in previously authorized bonds of the County, would finance the cost of construction and construction management associated with a new maintenance building complex at Mohansic Golf Course in Yorktown Heights. Work will include the construction of a new maintenance building, renovation of the existing maintenance building and shop, as well as demolition and removal of two existing barn structures, and associated site work and improvements.

The Department of Parks, Recreation and Conservation (the "Department") has advised that most of the existing buildings on the golf course are original to the site and were built over 80 years ago. The current maintenance facilities have well exceeded their intended useful life and no longer align with today's standards for safety, efficiency, or functionality. As a result, the Department has determined that a comprehensive upgrade of the entire maintenance complex is necessary to ensure continued support for the effective maintenance and operation of the golf course.

Design is underway and is anticipated to take two (2) months to complete and is being performed by consultants and in-house staff. It is estimated that construction will take approximately eighteen (18) months to complete and will begin after award and execution of the construction contracts.

It should be noted that your Honorable Board has previously authorized the County to issue bonds to finance RGM01, as follows: Bond Act No. 45-2015 in the amount of \$350,000, which funded design associated with the new maintenance and storage building complex; and Bond Act No. 135-2024, which amended Bond Act No. 45-2015 by expanding the scope of the project to include construction and construction management associated with the replacement of the existing electrical service into the park, by increasing the initial amount authorized by \$3,500,000, from \$350,000 to \$3,850,000, and by increasing the period of probable usefulness of said bonds. \$217,778 in bonds have been sold under Bond Act No. 135-2024. Accordingly, authority is now requested to amend Bond Act No. 135-2024, to expand the scope of the project to include construction and construction management associated with a new maintenance building complex, including the construction of a new maintenance building, renovation of the existing maintenance building and shop, as well as demolition and removal of two existing barn structures, and associated site work and improvements, and to increase the amount of bonds by \$10,700,000, from \$3,850,000 to \$14,550,000.

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of an amended bond act (“Amended Bond Act”) in the total amount of \$14,550,000, which includes \$3,850,000 in previously authorized bonds of the County of Westchester (“County”), to finance Capital Project RGM01 - Mohansic Maintenance Facility (“RGM01”).

The Amended Bond Act, which was prepared by the law firm Harris Beach Murtha, is required to finance the cost of construction and construction management associated with a new maintenance building complex at Mohansic Golf Course in Yorktown Heights. Work will include the construction of a new maintenance building, renovation of the existing maintenance building and shop, as well as demolition and removal of two existing barn structures, and associated site work and improvements.

The Department of Parks, Recreation and Conservation (the “Department”) has advised that most of the existing buildings on the golf course are original to the site and were built over 80 years ago. The current maintenance facilities have well exceeded their intended useful life and no longer align with today’s standards for safety, efficiency, or functionality. As a result, the Department has determined that a comprehensive upgrade of the entire maintenance complex is necessary to ensure continued support for the effective maintenance and operation of the golf course.

Your Committee is advised that design is underway and is anticipated to take two (2) months to complete and is being performed by consultants and in-house staff. It is estimated that construction will take approximately eighteen (18) months to complete and will begin after award and execution of the construction contracts.

Your Committee notes that your Honorable Board has previously authorized the County to issue bonds to finance RGM01, as follows: Bond Act No. 45-2015 in the amount of \$350,000, which funded design associated with the new maintenance and storage building complex; and Bond Act No. 135-2024, which amended Bond Act No. 45-2015 by expanding the scope of the project to include construction and construction management associated with the replacement of the existing electrical service into the park, by increasing the initial amount authorized by \$3,500,000, from \$350,000 to \$3,850,000, and by increasing the period of probable usefulness of said bonds. \$217,778 in bonds have been sold under Bond Act No. 135-2024. Accordingly, authority is now requested to amend Bond Act No. 135-2024, to further expand the scope of the project to include construction and construction management associated with a

new maintenance building complex, including the construction of a new maintenance building, renovation of the existing maintenance building and shop, as well as demolition and removal of two existing barn structures, and associated site work and improvements, and to increase the amount of bonds authorized by \$10,700,000, from \$3,850,000 to \$14,550,000.

The Planning Department has advised your Committee that based on its review, the current request under Capital Project RGM01 has been classified as an “Unlisted” action under the State Environmental Quality Review Act (“SEQRA”), which requires an appropriate environmental review. Your Committee has carefully considered the proposed legislation. It has reviewed the attached Full Environmental Assessment Form (EAF) and the criteria contained in Section 617.7 of Title 6 of the New York Codes, Rules and Regulations, the SEQRA regulations, to identify the relevant areas of environmental concern. For the reasons set forth in the attached EAF, your Committee believes that the proposed action will not have any significant adverse impact on the environment and urges your Honorable Board to adopt the annexed resolution by which this Board would issue a Negative Declaration for this proposed action.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Amended Bond Act. Accordingly, your Committee recommends the adoption of the proposed Amended Bond Act.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project: Mohansic Maintenance Facility (RGM01)
 Date: September 2025

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

The project will not have a significant environmental impact as it involves enhancements to an existing facility and is within an area that is already disturbed. There are no streams or wetlands on or near the site. Only four trees will need to be removed in order to accommodate the proposed improvements. New, more efficient structures will be offset by the removal of old structures which are past their useful life.

Since the project involves an existing maintenance facility, the improvements will serve to enhance maintenance operations as well as better protect the environment from these existing operations. Building renovations will improve the housing of pesticides and fertilizers. Surface and groundwater will be better protected by the new septic system, equipment wash and fueling station, and stormwater management infrastructure. Underground fuel tanks will be removed. All of the buildings will be electrically heated, which will reduce petroleum consumption as well as carbon emissions.

The County designated all County and State park lands as Critical Environmental Areas for the variety of benefits they provide, including recreational, educational, social, cultural and ecological benefits. The project will serve to support recreation by improving the maintenance of this popular public golf course.

County of Westchester, acting by and through its Board of Legislators, _____ as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. September 24, 2025

Westchester County Board of Legislators
800 Michaelian Office Building
White Plains, New York 10601

Dear Honorable Members of the Board of Legislators:

Transmitted herewith for your review and approval is a bond act ("Bond Act") which, if adopted, would authorize the County of Westchester ("County") to issue bonds in the amount of \$5,000,000 to finance the following capital project:

RHTF1 – Hilltop Hanover Farm and Environmental Center Improvements ("RHTF1").

The Bond Act, in the amount of \$5,000,000, would finance the cost of design for improvements to the existing buildings and infrastructure at Hilltop Hanover Farm and Environmental Center in Yorktown, including environmental studies, design, and engineering services for new buildings, and site improvements.

The Department of Parks, Recreation and Conservation ("Department") has advised that the Hilltop Hanover Farm and Environmental Center is a County-owned resource that operates both as an agricultural production farm and a native plant nursery, providing fresh produce to the community and supporting ecosystem restoration projects across the County. Advancing the Hilltop Hanover Farm Master Plan is the next critical step to ensure the Farm can sustain its mission, expand educational programming, and strengthen its role as a valued community asset. Design funding is necessary to prepare the detailed plans and specifications necessary to move the project forward.

Following bonding authorization, design will be scheduled and is anticipated to take twenty-four months to complete. It is anticipated that the design work will be completed by consultants. It is estimated that construction will take thirty-six months to complete and will begin after award and execution of the construction contracts.

Based on the importance of this project to the County, favorable action on the proposed Bond Act is respectfully requested.

Sincerely,

A handwritten signature in black ink, appearing to be "K. W. Jenkins", written over the printed name and title.

Kenneth W. Jenkins
Westchester County Executive

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of a transmittal from the County Executive recommending approval by the County of Westchester (“County”) of a bond act (“Bond Act”) in the amount of \$5,000,000 to finance capital project RHTF1 – Hilltop Hanover Farm and Environmental Center Improvements (“RHTF1”). The Bond Act, which was prepared by the law firm Harris Beach, will finance the cost of design for improvements to the existing buildings and infrastructure at Hilltop Hanover Farm and Environmental Center in Yorktown, including environmental studies, design, and engineering services for new buildings, and site improvements.

The Department of Parks, Recreation and Conservation (“Department”) has advised that the Hilltop Hanover Farm and Environmental Center is a County-owned resource that operates both as an agricultural production farm and a native plant nursery, providing fresh produce to the community and supporting ecosystem restoration projects across the County. Advancing the Hilltop Hanover Farm Master Plan is the next critical step to ensure the Farm can sustain its mission, expand educational programming, and strengthen its role as a valued community asset. Design funding is necessary to prepare the detailed plans and specifications necessary to move the project forward.

Following bonding authorization, design will be scheduled and is anticipated to take twenty-four months to complete. It is anticipated that the design work will be completed by consultants. It is estimated that construction will take thirty-six months to complete and will begin after award and execution of the construction contracts.

The Planning Department has advised your Committee that based on its review, RHTF1 may be classified as a Type “II” action pursuant to the State Environmental Quality Review Act (“SEQR”) and its implementing regulations, 6 NYCRR Part 617. Therefore, no environmental review is required. Your Committee has reviewed the annexed SEQR documentation and concurs with this recommendation.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Bond Act. Your Committee recommends the adoption of the proposed Bond Act.
