Dear Members of the Board of Legislators:

Transmitted herewith for your review and approval is a bond act (the "Bond Act") which, if adopted, would authorize the County of Westchester (the "County") to issue bonds in the amount of \$2,000,000 to finance a component of the following capital project:

SOS08 – Ossining WRRF Structural Rehabilitation ("SOS08").

The Bond Act, in the amount of \$2,000,000, would fund construction and construction management associated with shoreline restoration needed at the base of the secondary clarifiers and chlorine contact tanks at the Ossining Wastewater Resource Recovery Facility ("WRRF").

The Department of Environmental Facilities (the "Department") has advised that the shoreline along the WRRF consists of riprap revetment from the southern property boundary to the north around Final Clarifier No. 1 Tank and the Chlorine Contact Tank where the steel bulkhead system starts. Over the years, due to washout, the riprap revetment has experienced significant erosion. Furthermore, the base of the secondary clarifiers and chlorine contact tanks have become undermined due to the existing condition of the riprap. To mitigate further erosion of the shoreline and to protect the existing process tanks, the shoreline requires rehabilitation/replacement to restore the revetment to the proper slope with the proper gradation/layers of stone.

It should be noted that design was completed under Capital Project SW002. Following bonding authorization, construction will be scheduled and is estimated to take fifteen (15) months to complete and will begin after award and execution of the construction contracts.

Based on the importance of this project to the County, favorable action on the proposed Bond Act is respectfully requested.

## HONORABLE BOARD OF LEGISLATORS THE COUNTY OF WESTCHESTER, NEW YORK

Your Committee is in receipt of a bond act (the "Bond Act") in the amount of \$2,000,000, which, if adopted by your Honorable Board, would authorize the County of Westchester ("County") to finance a component of Capital Project SOS08 – Ossining WRRF Structural Rehabilitation ("SOS08").

The Bond Act, which was prepared by the law firm of Norton Rose Fulbright US, LLP, will fund construction and construction management associated with shoreline restoration needed at the base of the secondary clarifiers and chlorine contact tanks at the Ossining Wastewater Resource Recovery Facility.

The Department of Environmental Facilities (the "Department") has advised that the shoreline along the WRRF consists of riprap revetment from the southern property boundary to the north around Final Clarifier No. 1 Tank and the Chlorine Contact Tank where the steel bulkhead system starts. Over the years, due to washout, the riprap revetment has experienced significant erosion. Furthermore, the base of the secondary clarifiers and chlorine contact tanks have become undermined due to the existing condition of the riprap. To mitigate further erosion of the shoreline and to protect the existing process tanks, the shoreline requires rehabilitation/replacement to restore the revetment to the proper slope with the proper gradation/layers of stone.

Your Committee is advised that design was completed under Capital Project SW002. Following bonding authorization, construction will be scheduled and is estimated to take fifteen (15) months to complete and will begin after award and execution of the construction contracts.

The Planning Department has advised your Committee that based on its review, the above-referenced capital project may be classified as a Type "II" action pursuant to the State Environmental Quality Review Act ("SEQR") and its implementing regulations, 6 NYCRR Part 617. Therefore, no environmental review is required. Your Committee has reviewed the annexed SEQR documentation and concurs with this recommendation.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Bond Act. Your Committee recommends the adoption of the proposed Bond Act.

STATE ENVIRONMENTAL QUALITY REVIEW FOR CAPITAL PROJECT:

SOS08 OSSINING WRRF STRUCTURAL REHABILITATION

**PROJECT/ACTION:** Per Capital Project Fact Sheet as approved by the Planning Department on

12-10-2024 (Unique ID: 2721)

With respect to the State Environmental Quality Review Act and its implementing regulations 6 NYCRR Part 617, the Planning Department recommends that no environmental review is required for the proposed action, because the project or component of the project for which funding is requested may be classified as a TYPE II action pursuant to section(s):

• 617.5(c)(2): replacement, rehabilitation or reconstruction of a structure or facility, in kind, on the same site, including upgrading buildings to meet building, energy, or fire codes unless such action meets or exceeds any of the thresholds in section 617.4 of this Part.

**COMMENTS:** The current request for shoreline restoration requires a permit from the New York State Department of Environmental Conservation, which has classified this as a Type II action. Design and construction will utilize the preliminary flood insurance rate maps for coastal Westchester and other best available data concerning flood depths and wave action.
