Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project : WD305 Eastview Pump Station & Main
 Date : March 2026

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Impact on Land: Most of the project area is disturbed, consisting of existing public facilities and roadways. Only in the vicinity of the pump station may the water table be less than 3 feet deep. The pump station will occupy an area less than 3,500 SF and will be adjacent to the existing underground water meter chamber. Only a small section of pipeline will traverse land with slopes in excess of 15%. Minimal impacts are anticipated since the pipeline installation involves a 6-8 foot wide trench that will be backfilled and restored, with erosion/sediment controls in place during construction. Although construction will take over a year, it will be done in segments with sections stabilized as they are completed.

Impact on Water: Both the water main and the sewer line will need to cross a small stream and associated wetlands in different locations. In these areas, jack and bore or horizontal auger boring at depths of 7-10 feet will be employed to avoid surface disturbances and impacts to the streams and wetlands. Appropriate erosion and sediment controls will prevent wetland impacts where the main will be located within the wetland buffer zone on the east side of the parkway. Stormwater runoff from the added impervious surfaces associated with the pump station will be mitigated for quantity and quality by the installation of new drainage structures, including a hydrodynamic separator, prior to discharging to the existing on-site detention pond, which will be regraded and sized to handle the 100-year frequency storm.

Impact on Plants and Animals: Approximately 13 trees between 6-inch and 30-inch DBH will need to be removed to construct the pump station. These trees are on the east edge of the clearing that was previously made for the construction of water meter chamber and, as such, will not have an appreciable impact on habitat. The force main on the east side of the parkway will be routed to stay beyond the dripline of trees as much as possible, but a half dozen trees may be impacted. No endangered or threatened species or rare animals and plants have been identified using federal and state online resource tools. Nevertheless, timing of tree removals will be adjusted to avoid impacts to specific wildlife as may be required by NYSDEC. For the tree removals at the pump station site, which is NYCDEP property, tree replacements equivalent in total diameter will be provided, but must be planted off-site and will be coordinated with NYCDEP. Trees that need to be removed on the water tower site will be replaced with native species on a 2:1 ratio.

Impact on Historic and Archaeological Resources: The proposed pump station will be located 700 feet away from Hammond House and the proposed sewer main that will pass in front of Hammond House will be installed underground on the south side of Route 100C. NYS Office of Parks, Recreation and Historic Preservation has reviewed the overall project and has determined that there will be no adverse impact on historic or archaeological resources from this project.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the County of Westchester, acting by and through its Board of Legislators, _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

SUBJECT: **STATE ENVIRONMENTAL QUALITY REVIEW FOR CAPITAL PROJECT
WD305 COUNTY WATER DISTRICT #3 – EASTVIEW PUMPING STATION**

The Planning Department has reviewed the above referenced capital project (Fact Sheet Unique ID: 3093) in accordance with the State Environmental Quality Review Act and its implementing regulations, 6 NYCRR Part 617 (SEQR).

Pursuant to SEQR, this project is an Unlisted action. As required by the New York City Department of Environmental Protection for its land use approval, as well as by the New York State Environmental Facilities Corporation (EFC) to qualify for financing assistance, a Full Environmental Assessment Form was prepared for the project and coordinated review was initiated on behalf of the Board of Legislators.

In accordance with the procedures for coordinated review, a notice of intent for the County to serve as Lead Agency was distributed to involved and interested agencies on June 6, 2025. Since no objections were received, the Board of Legislators may assume the role of Lead Agency for the environmental review of this project. Attached is the Full Environmental Assessment Form for consideration by the Board of Legislators.
