Westchester County Board of Legislators
800 Michaelian Office Building
White Plains, New York 10601

Dear Members of the Board of Legislators:

Transmitted herewith for your review and approval is an amended Bond Act ("Bond Act") which, if adopted, would authorize the County of Westchester ("County") to issue additional bonds in the amount of \$10,000,000 to finance the following capital project:

SY095 – Pumping Station Rehabilitation Program – South Yonkers SSD ("SY095").

The Bond Act, in the total amount of \$11,000,000, which includes \$1,000,000 in previously authorized bonds of the County, would finance construction costs associated with the rehabilitation of the Main Street and Ludlow Street Pumping Stations in Yonkers. The work required at both pumping stations will include the replacement or repair of all mechanical, plumbing, fire protection, HVAC, odor control, electrical, instrumentation, structural, and architectural systems. This includes, but is not limited to, bar screens, pumps, piping and valves, gas and fire detection equipment, odor control equipment, conduit and wire, lighting, electrical distribution equipment, emergency generator (if present), control panels, floors, walls, windows, and roofs. Work at the Ludlow Street Pumping station will also include replacement of the existing superstructure in order to withstand flood water loading. Other flood hazard mitigation measures to be included at both pumping stations, will include, but not limited to, flood walls, flood doors, watertight hatches, sealing of building penetrations, and raising of equipment.

The Department of Environmental Facilities ("Department") has advised that the pumping station equipment has reached the end of its useful life and is in need of repair and replacement. As part of the Department's pumping station maintenance plan, all of the County's pumping stations are rehabilitated approximately once every twenty years on a rolling schedule. These two pumping stations are due for rehabilitation. The Department must keep all wastewater treatment equipment in good working order in accordance with State and Federal regulations.

Design is currently underway by consultants and is anticipated to be complete by the end of the year. It is estimated that construction will take twenty-four (24) months to complete and will begin after award and execution of the construction contracts.

It should be noted that your Honorable Board has previously authorized the County to issue bonds to finance a prior component SY095, as follows: Bond Act No. 202-2019 in the amount of \$1,000,000 which financed design and construction management of SY095. These bonds have not been sold.

Accordingly, it is now requested that Bond Act No. 202-2019 be amended to increase the total amount authorized by \$10,000,000, for a total authorized amount, as amended, of \$11,000,000, to revise the scope of Bond Act No. 202-2019 to include work associated with the construction phase of the project and to increase the period of probable usefulness of said bonds.

The Planning Department has advised that based on its review, the above-referenced capital project has been classified as a "Type II" action pursuant to the State Environmental Quality Review Act ("SEQR") and its implementing regulations, 6 NYCRR Part 617. Therefore, no further environmental review is required. As you know, your Honorable Board may use such expert advice to reach its own conclusion.

Based on the importance of this project to the County, favorable action on the proposed Bond Act is respectfully requested.

Sincerely,

**HONORABLE BOARD OF LEGISLATORS
THE COUNTY OF WESTCHESTER, NEW YORK**

Your Committee is in receipt of an amended bond act (the “Bond Act”), in the total amount of \$11,000,000, which includes \$1,000,000 in previously authorized bonds of the County of Westchester (“County”), to finance Capital Project SY095 – Pumping Station Rehabilitation Program – South Yonkers SSD (“SY095”). The Bond Act, which was prepared by the law firm Norton Rose Fulbright, is required to finance construction costs associated with the rehabilitation of the Main Street and Ludlow Street Pumping Stations in Yonkers. The work required at both pumping stations will include the replacement or repair of all mechanical, plumbing, fire protection, HVAC, odor control, electrical, instrumentation, structural, and architectural systems. This includes, but is not limited to, bar screens, pumps, piping and valves, gas and fire detection equipment, odor control equipment, conduit and wire, lighting, electrical distribution equipment, emergency generator (if present), control panels, floors, walls, windows, and roofs. Work at the Ludlow Street Pumping station will also include replacement of the existing superstructure in order to withstand flood water loading. Other flood hazard mitigation measures to be included at both pumping stations, will include, but not limited to, flood walls, flood doors, watertight hatches, sealing of building penetrations, and raising of equipment.

The Department of Environmental Facilities (“Department”) has advised that the pumping station equipment has reached the end of its useful life and is in need of repair and replacement. As part of the Department’s pumping station maintenance plan, all of the County’s pumping stations are rehabilitated approximately once every twenty years on a rolling schedule. These two pumping stations are due for rehabilitation. The Department must keep all wastewater treatment equipment in good working order in accordance with State and Federal regulations.

Your Committee is advised that design is currently underway by consultants and is expected to be completed by the end of this year. It is estimated that construction will take twenty-four (24) months to complete and will begin after award and execution of the construction contracts.

It should be noted that your Honorable Board has previously authorized the County to issue bonds to finance a prior component SY095, as follows: Bond Act No. 202-2019 in the amount of \$1,000,000 which financed design and construction management of SY095. These bonds have not

been sold. Accordingly, it is now requested that Bond Act No. 202-2019 be amended to increase the total amount authorized by \$10,000,000, for a total authorized amount, as amended, of \$11,000,000, to revise the scope of Bond Act No. 202-2019 to include work associated with the construction phase of the project and to increase the period of probable usefulness of said bonds.

The Planning Department has advised your Committee that based on its review, the above-referenced capital project has been classified as a Type "II" action pursuant to the State Environmental Quality Review Act ("SEQR") and its implementing regulations, 6 NYCRR Part 617. Therefore, no further environmental review is required. Your Committee has reviewed the annexed SEQR documentation and concurs with this conclusion.

It should be noted that an affirmative vote of two-thirds of the members of your Honorable Board is required in order to adopt the Bond Act. Your Committee recommends the adoption of the proposed Bond Act.

The Commissioner of Finance is hereby authorized to enter into such agreements as said Commissioner of Finance shall determine reasonable and necessary to facilitate the issuance, sale, resale and, or repurchase of such bonds or notes pursuant to the provisions of Section 54.90 of the Local Finance Law. Such bonds and, or notes shall be of such terms, form and contents, and shall be sold in such manner, as may be prescribed by said Commissioner of Finance.
